Thresholds will be indexed to match cost of life increases as defined in the internal regulations (by-laws) of the ALT-EDIC.

## ANNEX III

### Contributions

#### General Conditions:

As a Member of the ALT-EDIC the EEA Member State or Region has financial obligations and shall make payment to the EDIC budget. The payment of the contribution can be made either by the EEA Member State or by the Region, its representing entity or any entity designated by the EEA Member State or by the Region. Two forms of contributions are possible: financial and in-kind. Third parties can also contribute to the ALT-EDIC budget. The Observers and other parties which are not members of the ALT-EDIC are encouraged to provide voluntary donations to the ALT-EDIC, and such donations shall not be considered as contributions.

The primary method of determining the ALT-EDIC Members' contributions to the ALT-EDIC budget is based on their Gross National Income (GNI)<sup>10</sup>. Each Member and Region contribute to the ALT-EDIC budget according to their level of GNI. The GNI figures for EU Member States used to calculate the minimum global contribution per year were provided by EU Member States and verified by Eurostat (source: eurostat.org GNI 2021). The GNI figures for the three EEA Member States outside the EU were based on data from the World Bank (source: data.worldbank.org GNI 2021).

In-kind contributions must be based on a fair, verifiable calculation basis, and assessed by experts when necessary.

#### GNI calculation and contribution rate:

The GNI calculation for the ALT-EDIC budget purposes involves various adjustments and harmonisation measures to ensure consistency and equity across the ALT-EDIC Members. These adjustments aim to eliminate differences in national accounting practices and ensure a fair and comparable basis for contributions.

Each ALT-EDIC Member contribution rate is determined based on its GNI. ALT-EDIC Members with a higher GNI shall contribute more to the ALT-EDIC budget, while those with a lower GNI contribute less. The country with the lowest gross national income of 30 shall pay €50,000 annually. The country with the highest gross national income shall pay a minimum of €500,000.

When a Region is a Member, its contribution is calculated with the same method as if it were a State.

GNI 2021 data for all EEA countries are presented in Table 1, column: GNI 2021 in M€. The formula (Table 1, Column: Contribution for EDIC/1 year) calculates a linear interpolation to assign a minimal amount between €50,000 and €500,000 based on each country's GNI (the lowest GNI paying €50,000 and the country with the highest GNI paying €500,000) that shall be paid annually per Member. Other countries will have intermediate amounts depending on their relative GNI compared to the minimum and maximum. The coordinating country (France) shall contribute 50% more of the calculated amount. Additional financial and in-kind contribution are possible per Member.

#### Expected ALT-EDIC Members contributions:

For the preparatory phase and the first year of the ALT-EDIC activity, it is expected to gather 17 representatives of EEA Members States then 22 in year 2 and 27 in year 3. As the ALT-EDIC was formally created in Q2 2024, the first contribution of the ALT-EDIC Member shall cover years 2024

---

<sup>10</sup> Gross national income (GNI). The sum of incomes of the residents of a national economy , including investment income

and 2025. The first contribution shall be paid by September 30, 2024, and from 2026 onwards each annual contribution shall be paid by March 31.

After consulting numerous EEA Member States and Regions, most of them will have in-kind resources to offer. For countries wishing to contribute in-kind, they will be allowed to pay 50% of the minimal annual global contribution in financial contribution (Table 2, column (B): Minimal financial contribution (50% of minimal global contribution)), with the remainder being contributed in-kind.

According to the information gathered from the EEA Member States and Regions, its in-kind contributions are expected to significantly exceed the 50% required. Therefore, in the budget calculation - Table 2, column (C): In-kind\* (75% of minimal global contribution), it is estimated that the in-kind contributions will reach 75% of the overall minimum required contribution.

### Policies

#### *Access policy for users*

The users are defined as public or private entities located in the EU Member States and in EEA countries requesting to use the ALT-EDIC outputs to develop projects, applications, solutions or services.

The ALT-EDIC outputs are:

- Platform for gathering text and voice databases;
- Inclusive and representative data collection for language modelling;
- Artificial data generation framework for low-resource languages;
- Compilation and provision of open-source fine-tuned, reduced and optimised language models;
- Support services: training, information, community-building, incubation, technology transfer and advisory unit;
- Call for projects.

Requests for access to an ALT-EDIC output will be made through a dedicated space in the ALT-EDIC website, and processed by the ALT-EDIC teams. Then, under conditions set out by the Director for each output, access will be granted or not to the user.

Access to data is defined in the data policy of the ALT-EDIC and will comply with the European data Act and the GDP Regulation.

Access to the platform will be defined by ALT-EDIC Members on proposition of the Director.

Training, information and advisory services will be provided on request from users.

Incubation and technology transfer services will target the European industrial community, with a specific focus on SMEs.

For each call for projects launched by the ALT-EDIC, specifications and target users will be defined by the Director in compliance with the leading principles of the ALT-EDIC and rules of fair and open participation.

Detailed rules and conditions for access to the ALT-EDIC outputs will be compiled in a document proposed by the Director and validated by the Assembly of Members.

**1. The ALT-EDIC's dissemination efforts shall focus on engaging the following target groups:**

a) Member organisations and institutions within the ALT-EDIC: The dissemination activities will prioritise providing targeted information to Members and Observers within the ALT-EDIC. This ensures that they are well-informed about the ALT-EDIC's activities and can actively contribute to achieving the ALT-EDIC's goals.

b) Policy-Makers, Government Bodies, and Regulatory Authorities: the ALT-EDIC recognises the significance of involving policy makers, government bodies, and regulatory authorities in shaping the digital infrastructure landscape. Disseminating information to this group will promote collaboration, exchange of expertise, and facilitate the adoption of policies aligned with the ALT-EDIC's vision.

c) Industry Stakeholders: the ALT-EDIC acknowledges the importance of engaging industry stakeholders, including technology companies, service providers, and vendors. Disseminating relevant information to this group will foster collaboration, innovation, and drive the development of a robust digital infrastructure ecosystem.

d) Researchers, Scientists, and Academics: The dissemination policy will cater to the needs of researchers, scientists, and academics by providing them with targeted information regarding the ALT-EDIC's activities. This group plays a pivotal role in advancing digital infrastructure research and development, and their engagement is essential for the ALT-EDIC success.

e) International Organisations, Association and Consortia: Collaboration with national and international organisations, association and consortia in Language Technologies is essential for the ALT-EDIC's objectives. Dissemination activities will target this group to ensure the exchange of knowledge, best practices, and promote international cooperation in the field of digital infrastructure.

f) General Public and Media Representatives: the ALT-EDIC believes in the importance of raising awareness among the general public and media representatives. Disseminating information to this group will foster understanding, generate public discourse, and ensure the relevance and impact of digital infrastructure in society.

**2. Dissemination Channels:**

To achieve effective dissemination to the target audiences, the ALT-EDIC shall utilise the following channels:

a) Web Portal: the ALT-EDIC shall establish and maintain an official web portal as a central platform for disseminating information. The web portal will provide easy access to relevant materials, including activities, initiatives, and the official statutes of the ALT-EDIC.

These workshops will provide a platform to present and discuss the ALT-EDIC's activities and its impact.

d) Presence in Conferences: the ALT-EDIC representatives shall actively participate in relevant conferences and events. This presence will enable the dissemination of information about the ALT-EDIC's activities, sharing of expertise, and fostering collaboration within the wider language technologies community.

### *Intellectual property rights policy*

Intellectual property rights are governed by the following principles.

#### **1.1 PROPRIETARY KNOWLEDGE (background)**

Subject to any rights of third parties, each Member retains full and complete ownership of its PROPRIETARY KNOWLEDGE. PROPRIETARY KNOWLEDGE communicated will be treated by ALT-EDIC as confidential information, the treatment of which will be specified in ALT-EDIC's internal regulations (by-laws).

#### **1.2 NEW KNOWLEDGE (foreground)**

##### **a) PROPRIETARY NEW KNOWLEDGE**

Each Member is the owner of its own new knowledge which has obtained alone in carrying out the actions referred to in article 3 and shall be deemed PROPRIETARY NEW KNOWLEDGE. It shall decide alone on the appropriateness and nature of the protective measures to be taken (patent application, sealed deposit, etc.) and shall initiate the necessary procedures on its own initiative, in its own name and at its own expense.

## b) COMMON NEW KNOWLEDGE

NEW KNOWLEDGE developed jointly by the Members in carrying out the actions referred to in Article 3 shall be deemed to be COMMON NEW KNOWLEDGE; the Members shall be equal co-owners thereof, unless they agree on a case-by-case basis to a different distribution of the co-ownership shares.

The co-owning Members may appoint one of them to represent the co-ownership and act on its behalf under conditions to be defined between them.

The co-owning Members of the COMMON NEW KNOWLEDGE (and any resulting property titles) will negotiate in good faith a set of co-ownership and exploitation rules, as well as the nature of any protective measures to be taken (patent application, sealed deposit, etc.).

It is hereby agreed that the co-ownership agreement will not allow co-owning Members to exploit alone, directly or indirectly, the COMMON NEW KNOWLEDGE without the prior consent of the other co-owning Members and without having to pay financial compensation to ALT-EDIC. The determination of such financial compensation will be determined on a case-by-case basis.

For the purposes of this article:

“PROPRIETARY KNOWLEDGE” refers to all technical and/or scientific information and knowledge developed by a Member before it signed the ALT-EDIC Statutes, which belongs to it or over which it holds rights of use and exploitation necessary for carrying out the actions referred to in Article 3. The Members' PROPRIETARY KNOWLEDGE required to carry out these actions is exhaustively specified in the Internal Regulations or in any other document they deem appropriate.

“NEW KNOWLEDGE” refers to all technical and/or scientific information and knowledge developed by one or more Members in the course of carrying out the actions referred to in Article 3.

“PROPRIETARY NEW KNOWLEDGE” refers to all NEW KNOWLEDGE developed by a single Member in the course of carrying out the actions referred to in Article 3.

“COMMON NEW KNOWLEDGE” refers to any NEW KNOWLEDGE developed by two or more Members, the characteristics of which are such that it is not possible to separate the contribution of each of the Members concerned for the purposes of applying or obtaining a property right or taking any protective measures.

### *Data policy*

A Data Management Plan (DMP) will be defined in early stage of the project and proposed by Director to the Assembly of Members. It will be systematically updated. It will be implemented in order to ensure a high level of data quality and accessibility for users and Members.

The plan will outline what data the project will generate, whether and how they will be exploited or made accessible for verification and re-use, and how they will be curated and preserved. The DMP will be monitored to include different data-related issues appearing during the project lifetime. It will address:

(a) data set reference and name (unique identifier for the data produced),

- (b) data set description (description, origin, nature, scale, reuse, integration, publish ability, etc.),
- (c) confidentiality (by data set, to enable successful exploitation),
- (d) standards and metadata (reference to standards, how metadata will be created, etc.),
- (e) data dissemination and policies for data sharing and public access (policies and provisions for re-use, redistribution and production of derivatives, access procedures, data sharing practices etc.),
- (f) plans for archiving and preservation (including storage/backup),
- (g) a comprehensive data-protection policy; and
- (h) an Intellectual property (IP) protection roadmap, including the selection of data streams for external publication, to avoid conflicts with IP protection.

All data generated by the project will follow FAIR (Findable, Accessible, Interoperable, Reusable) data principles, adopt data quality standards and data integration operating procedures. A number of best practices and guidelines for working with Open Data are available and will be taken into account.

Existing and new publicly available databases (Open Access) and restricted access databases provided by Members will be the main source of data. From these databases, only data relevant to the ALT-EDIC projects will be processed. Standardised formats and vocabularies for data and metadata will be used in order to improve interoperability.
